

Lisaney Kong

Nashville, TN 37208

704.975.6925 · one@lisaney.com · [LinkedIn](#)

A multidisciplinary operations professional with over a decade in enterprise software operations, systems implementation, and cross-functional program coordination, now completing a Master of Space Operations at Embry-Riddle Aeronautical University. Built a startup's first enterprise information system and BI platforms and carried them through its acquisition, integrated disconnected platforms into automated workflows, and served as the technical subject matter expert bridging engineering teams, business units, and executive leadership. Founded, scaled, and sold four business locations with full P&L ownership. Graduate training spans space mission operations, launch and satellite systems, space law and policy, space cybersecurity, and systems engineering, including a sole-authored capstone conceptual design of an Active Debris Removal mission covering trade studies, sensor selection, propulsion sizing, TRL gating, and lifecycle cost. Actively targeting **Program Management, Technical Program Management, and Systems Engineering** roles within the **commercial space and defense sector**.

SKILLS

- Program Management
- Technical Project Management
- Schedule Management
- Budget & Resource Planning
- Risk Management
- Risk Mitigation
- Supplier Negotiation
- Cross-functional Leadership
- Systems Engineering
- Requirements Development
- Trade Studies
- Lifecycle Management
- Stakeholder Management
- Process Automation
- Root Cause Analysis
- Capacity Planning
- MS Project
- JIRA
- Python
- Tableau
- Power BI
- Salesforce
- Data Analysis
- P&L Ownership

EDUCATION

Master of Space Operations, expected December 2026

Embry-Riddle Aeronautical University, Worldwide Campus

Space mission operations and the commercial space economy: launch systems, satellite communications, Earth observation and remote sensing, commercial and governmental space infrastructure, human spaceflight, space law and policy, and cybersecurity for space systems

Capstone (sole-authored): Active Debris Removal mission concept for an uncooperative 8,900 kg rocket body — trade study, Flash LiDAR relative navigation, dual-propulsion sizing, TRL gating, \$290.5M lifecycle cost, and a recorded technical defense

Applied project (sole-authored): 20-year investment analysis of a commercial Earth-observation operator — market sizing, government revenue exposure, constellation tradeoffs, and scenario-based projections

Applied project (sole-authored): original air-launch provider and 72-satellite LEO constellation concept for regulated biopharmaceutical payloads

Graduate Certificate in Systems Engineering, expected February 2027

Embry-Riddle Aeronautical University, Worldwide Campus

Systems engineering lifecycle: requirements development and traceability, system architecture and modeling, configuration management, reliability and maintainability, and verification and validation

Team project: fault-tolerant redesign of the Boeing 737 MAX MCAS flight control system (authored introduction and conclusion)

Master of Science in Space Systems, expected August 2027

Embry-Riddle Aeronautical University, Worldwide Campus

Design and analysis of space systems and components using systems engineering principles, with coursework in space systems engineering, program management, automation, and structural materials

Bachelor of Arts in Theatre Arts, 2008

Catawba College, Salisbury, NC

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

NASA L'SPACE Proposal Writing & Evaluation Experience (NPWEE) Academy, Fall 2026

Selected participant, NASA Lucy Mission — interdisciplinary team proposal development and NASA Proposal Review Panel
Siemens NX CAD training through the program, in progress

The National Society of Leadership and Success, Member

Leadership honor society

PROFESSIONAL EXPERIENCE

SoftwareOne, Nashville, TN

2024

Mid-Market Digital Account Manager | Cloud & Licensing Operations

- Drove operational execution and process improvement for global cloud and Microsoft licensing programs
- Led cross-functional initiatives with technical teams and external partners to establish enterprise system integration standards
- Acted as liaison between technical product teams and enterprise stakeholders, ensuring complex licensing structures met regulatory and compliance requirements

Achievers Solutions Inc., Remote

2022 – 2023

Account Executive, Mid-Market | Customer Lifecycle Operations

- Managed the full operational lifecycle of enterprise deployments for organizations of 500+ employees on an HR software and HRIS data-integration platform
- Integrated three disconnected data and workflow platforms into a single automated process, eliminating manual tracking
- Ran high-volume, precision-driven workflows across enterprise data systems with zero-defect data quality

Vault.co, Remote

2021 – 2022

Senior Manager

- Directed cross-functional operations across three departments during rapid organizational scale-up through the company's acquisition
- Co-architected the company's first enterprise information system (Salesforce), engineering custom workflows for four departments
- Designed and implemented Tableau and Power BI reporting platforms, delivering monthly analysis and briefings to the executive chairman
- Directed national conference programs end to end — planning, logistics, materials, travel, and on-site execution
- Coordinated requirements across stakeholders for the organization's largest customer deployment, onboarding 1,000 users to the platform

ServiceSource (acquired by Concentrix), Remote

2018 – 2021

Associate Technical Specialist

- Served as subject matter expert for cybersecurity and IT networking infrastructure for Fortune 500 organizations, mentoring colleagues on technical content
- Collaborated with engineers and technical architects to design, test, and present technical demonstrations across Blackberry, Cisco, and Vidyo portfolios
- Scoped a HIPAA-compliant file-sharing solution for a healthcare organization, working through compliance requirements and technical fit with the Director of IT and CFO
- Analyzed usage metrics in Python and Tableau to set deployment strategy and work priorities

Cornelius Ballroom Dance Co. (dba Planet Ballroom Lake Norman), NC

2009 – 2018

President & Owner

- Founded, scaled, and directed end-to-end operations for four Planet Ballroom franchise locations over eight years, through the sale of all four
- Owned full P&L, vendor contracts, facility management, and logistics across all locations
- Planned staffing and capacity against demand, consolidating reporting from disconnected systems into one operating view
- Recruited, trained, and led highly specialized instructional and administrative staff
